

Metric Accessories

Overview

Metric fittings and thermowells help you design your equipment to meet global standards. Use these fittings to install Minco sensors in process lines, rotating machinery, and all types of industrial equipment.

Special threads and accessories are available.

Fluid seal spring-loaded holders: Spring-loaded holders provide fast installation and simple adjustment or removal of probes. Minco's unique designs work with straight probes and provide sealing for the typical oil pressures found in rotating machines.

Fluid seal fittings: Fluid seal fittings are a low cost solution where a connection head is not required.

Bayonet adapters: Bayonet adapters work with Minco's spring-loaded bayonet fitted probes.

Adapter bushings: Adapter bushings allow fitting ½ - 14 NPT fittings into metric threaded process connections.

Thermowells: Thermowells provide high-pressure protection and allow probe replacement without opening the system.
