

Cooling Tower Controllers

WCT/WDT400 Series

The WCT/WDT Cooling Tower Controllers represent the latest in technological and innovative advancements from Walchem. All of the standard features you'd expect in a conventional cooling tower controller are included, plus simple-to-use information management tools that enable water treatment professionals to deliver more effective service to their customers.

The WCT/WDT controllers have the ability to store conductivity, pH/ORP, and temperature values, water usage, relay and flow switch status, and user settings. A USB memory stick is all that's needed to extract the information. Download logs from the USB stick to a PC at your convenience, or copy your preferred treatment program settings to another controller to speed start-up. It couldn't be easier!

Summary of Key Benefits

➤ Ensures Optimal Performance and Maximum Efficiency

Precise control of conductivity and chemical feed reduces water consumption and inhibits corrosion, solids precipitation, scale build-up, and growth of algae or dangerous bacteria.

➤ More Informative Monthly Reports

Download stored data from the controller to a USB flash stick. Use the data to easily develop reports that show actual water usage, system conductivity, temperature, and more.

➤ Efficient Customer Service

Quickly identify system upsets by knowing exactly what happened and when. An event log can be downloaded to tell you precisely when pumps turned on, valves opened, and when there was flow or no-flow.

➤ Validation and Verification Made Easy

Use stored data from the controller to simply and easily validate water treatment results. The data and event logs show water usage, system conductivity, and temperature, as well as accumulated chemical feed and bleed times.

➤ Save Time

Copy the user settings from your controller to a USB flash stick and upload to a new controller. Programming your new controller this way can be accomplished in seconds. It's that simple!

Features

WCT/WDT400 Series | Feed and Bleed Cooling Tower Controller

- » **Four chemical feed options**
 - Feed & bleed, with or without feed lockout timer
 - Feed after bleed has finished, as a percentage of time
 - Feed as a percentage of time elapsed
 - Feed as a percentage of make-up water
- » **Self-Diagnostics**
 - Software, electronics, and sensor are constantly monitored without having to take controller offline.
- » **Conductivity Electrodes**
 - Graphite or stainless steel
 - Low pressure or high pressure
 - In-line or submersion
- » **4-20mA Output**
 - Optional isolated 4-20mA output proportional to the conductivity reading.
- » **Flow Switch Manifolds**
 - Optional integrated flow switch manifold may be panel mounted for quick, professional installation with only two process connections.
- » **Flow Meter Input**
 - Accommodates a wide range of contacting and Hall Effect water meters
- » **USB Flashstick Support**
 - Standard for data logs, event/relay and reset logs, and user configuration file import/export

WCT/WDT410 Series | Feed and Bleed Cooling Tower Controller with Dual Biocide Timers

The 410 Series offers all of the 400 features as well as:

- » **Programmable Dual Biocide Timers**
 - Choice of 1, 7, 14, or 28-day cycles
 - Able to: add a single biocide at any time or dual alternating biocides, or dual independent biocides
- » **Alarm Output Relay**
 - Triggered by low conductivity, high conductivity, or no-flow conditions
- » **pH or ORP Control (WDT410 only)**
 - Choice of pH or ORP sensor for control of acid or chlorine/bromine addition.
- » **Ability to Bleed on Volumetric Cycles**
 - Ideal for systems with low conductivity makeup water

USB Features

Integrated datalogging collects analytical measurements at 10 minute intervals and captures all relay activations.

Specifications

Measurement Performance

	Range	Resolution	Accuracy
Conductivity	0-10,000 $\mu\text{S}/\text{cm}$	1 μS	0-10,000 $\mu\text{S}/\text{cm} \pm 1\%$ of reading 0-10 $\mu\text{S}/\text{cm} \pm 20\%$ of reading
Temperature	32 to 158°F (0 to 70°C)	0.1°F (0.1°C)	$\pm 1\%$ of reading
pH (WDT410 only)	-2 to +16 pH units	0.01 pH units	± 0.01 pH units (calibrated)
ORP (WDT410 only)	± 1500 mV	1 mV	± 1 mV (calibrated)

Inputs

Power

100-240 VAC, 50/60 Hz, 8A

Fuse: 1.0 ampere, 5 x 20 mm

Signals

Cond Electrode: 1.0 cell factor, 10K thermistor

pH/ORP: Requires a preamplified signal.

(WDT410 only) Walchem WEL series recommended. $\pm 5\text{V}$ power available for external preamp. Note: Temperature compensation for pH input is accomplished using the conductivity electrode temp element. ORP measurement does not use temp comp.

Flow Meter (optional): Isolated, dry contact closure required (i.e. relay, reed switch)

Flow Switch (optional): Isolated, dry contact closure required (i.e. reed switch)

	Cond Electrodes	Flow switch inputs	Flow meter inputs	pH/ORP inputs
WCT	1	1	2	
WDT400	2	2	2	
WDT410	1		2	1

Outputs

Mechanical Relays

WCT400: Two powered relays (Bleed, Feed)

WCT410: Five powered relays (Bleed, Feed, Bio1, Bio2, Alarm)

WDT400: Five powered relays (Bleed & Feed for each tower, Diagnostic Alarm)

WDT410: Six powered relays (Bleed, Feed, Bio 1, Bio 2, pH/ORP, Alarm)

6 A (resistive), 1/8 HP. All relays are fused together as one group, total current for this group must not exceed 6A

4 - 20 mA (0, 1 or 2 optional)

Internally powered

Fully isolated

600 Ohm max resistive load

Resolution .001% of span

Accuracy $\pm 1\%$ of reading

Flow switch manifold & sensor

Connections $\frac{3}{4}$ " NPTF

Temperature 140°F (60°C)

Pressure 150 psi up to 100°F (38°C), 50 psi at 140°F (60°C)

Materials of Construction & Pressure Ratings

Standard electrode 150 psi (10 bars)

pH/ORP electrode (WDT410 only) 100 psi (6.9 bars)

High pressure electrode 300 psi (20 bars)

Flow switch manifold 300 psi (20 bars)

PP/Stainless steel electrode 150 psi (10 bars)

High pressure manifold 300 psi (20 bars)

GFRPP, Graphite, FKM

GFRPP, CPVC, HDPE, FKM, Glass, Platinum (ORP only), Titanium

316SS, PVDF

GFRPP, PVC, Isoplast, FKM

GFRPP, 316SS, FKM

Carbon steel, Steel

Ordering Information

WCT400
WCT410 —    
WDT400 voltage output sensor USB
WDT410

VOLTAGE

1 = 120 VAC, prewired
5 = 100-240 VAC, conduit

OUTPUT

N = No data output
4 = Single 4-20 mA output
2 = Dual 4-20 mA output (WDT)

SENSOR

N = No electrode

WCT400/410

- 1 = PP/Graphite electrode & tee, 20ft. (6.1m) cable (for in-line or submersion mounting)
- 2 = PP/Graphite electrode & flow switch manifold mounted on PP panel, 5 ft. (1.5m) cable
- 4 = High pressure electrode (up to 300 psi), 20 ft. (6.1m) cable
- 5 = High pressure electrode & flow switch manifold on PP panel, 5 ft. (1.5m) cable
- 6 = PP/SS electrode & tee, 20 ft. (6.1m) cable
- 7 = PP/SS electrode & flow switch manifold on PP panel, 5 ft. (1.5m) cable

WDT400

- 1 = Two graphite electrodes & tees, (inline or submersion) 20ft. (6.1m) cable
- 2 = Two graphite electrodes & flow switch manifolds, 20 ft. (6.1m) cable
- 4 = Two high pressure electrodes & glands, 10 ft.(3m) cable
- 5 = Two high pressure electrodes & flow switch manifolds 20 ft. (6.1m) cable
- 6 = Two SS electrodes & tees, 20 ft. (6.1m) cable
- 7 = Two SS electrode & flow switch manifolds on PP panel, 20 ft. (6.1m) cable

WDT410

- 1 = SS + pH electrodes & tees, (inline or submersion), 20ft. (6.1m) cable
- 2 = SS + ORP electrodes & tees (inline or submersion), 20 ft. (6.1m) cable
- 3 = SS + pH electrodes & flow switch manifold on PP panel, 5ft. (1.5m) cable
- 4 = SS + ORP electrodes & flow switch manifold on PP panel, 5ft. (1.5m) cable
- 6 = Graphite + pH electrodes & tees (inline or submersion), 20ft. (6.1m) cable
- 7 = Graphite + ORP electrodes, & tees (inline or submersion), 20ft. (6.1m) cable
- 7R = Graphite + ORP rod style electrode & tees, ft. (inline or submersion), 20ft. (6.1m) cable
- 8 = Graphite + pH electrodes & flow switch manifold on PP panel, 5ft. (1.5m) cable
- 9 = Graphite electrode, ORP electrode & flow switch manifold on PP panel, 5ft. (1.5m) cable
- 9R = Graphite + ORP rod style electrode & flow switch manifold on PP panel, 5ft. (1.5m) cable
- A = High pressure electrodes (Cond + pH) & flow switch manifold on PP panel, 5ft. (1.5m) cable
- B = High pressure electrodes (Cond + ORP) & flow switch manifold on PP panel, 5ft. (1.5m) cable

USB FEATURES

U = Integrated datalogging, event/reset logging, and configuration file import/export

Webmaster®ONE

WebMasterONE is the most advanced online cooling tower and boiler controller in the water treatment industry. The flexible multi-I/O platform allows you to control multiple cooling towers, boilers, closed loops, and condensate lines with just one controller. An extensive assortment of integrated communications and data handling features are included that enable water treatment professionals to provide more effective water management services to their customers.

Metering Pumps

The E-Class is the most innovative and comprehensive metering pump product line in the world. Over 50 years of pump experience and a commitment to superior mechanical design has led to development of many industry firsts, including 360 stroke-per-minute technology, IP67 waterproof construction, and the world's highest capacity solenoid metering pumps.

WIND WebMaster® Industrial Water Controllers

Walchem's WebMaster Industrial (WIND) Controller sets a new standard for Industrial Water Treatment Controllers. WIND has a flexible multi-I/O platform, a wide range of analytical sensor measurement capabilities, and an extensive assortment of integrated communications and data handling features.

WebAlert® Remote Monitor

Walchem's WebAlert is the first stand alone remote monitoring device that can web enable your installed equipment without having to replace or upgrade it.

AGENCY CERTIFICATIONS

Safety: UL 61010-1:2012, 3rd Edition
CSA C22.2 No.61010-1:2012, 3rd Edition
IEC 61010-1:2010 3rd Edition
EN 61010-1:2010 3rd Edition

EMC: IEC 61326-1:2005
EN 61326-1:2006

Note: For EN61000-4-6, EN61000-4-3 the controller met performance criteria B.

This equipment is suitable for use in establishments other than domestic and those directly connected to a low voltage (100-240 VAC) power supply network which supplies buildings used for domestic purposes.

ABOUT US

Walchem integrates its advanced sensing, instrumentation, fluid pumping and communications technologies to deliver reliable and innovative solutions to the global water treatment market. Our in-house engineering is driven by quality, technology and innovation. For more information on the entire Walchem product line, visit: www.walchem.com
