High Purity Dimensional Guide

Piping systems engineered to meet the most demanding industrial applications

Together, with our internationally recognized partner Agru of Austria, Asahi/America provides the most comprehensive and technologically advanced high purity piping systems available. Purad® Ultra High Purity PVDF, PolyPure® Natural Polypropylene and PP-Pure® Pigmented Polypropylene offer more sizes, fittings and pressure ratings than from any other single source. This extensive product offering is supported by an experienced and knowledgeable group of staff engineers, technicians and sales agents, all ready to assist you with your applications requirement.

Note to this Guide:

All the systems are metric sized based on Standard Dimension Ratio or SDR pipe sizes. All systems have constant outside diameters exactly in millimetres, regardless of material. Imperial (inch) OD are provided as nominal sizes only.

Within the SDR System, nominal pressure ratings vary according to material but not OD. Pressure ratings generally remain constant within material and SDR classification. For example all SDR21 PVDF pipe and fittings are rated to 16 bar or 230 psi. Exceptions, if any, may be found in cases where valves or threads carry ratings independent of SDR sizing.

Purad® UHP PVDF

SDR21, PN16/230psi, Sizes 20-280mm

SDR33, PN10/150psi, Sizes 90-315mm

PolyPure® Natural PP

SDR11, PN10/150psi, Sizes 20-110mm

PP-Pure® Pigmented PP

SDR11, PN10/150psi, Sizes 20-315mm

AGRU CAD CD

Agzu has released Agzu CAD, a CAD part file generation software for their piping systems. This software allows users to download part models (drawings) in a wide variety of file formats. Copies of Agzu CAD are available FREE of charge upon request, Please email us at asahi@asahi-america.com to request your copy. Use code PUB60070 when ordering.

Please note this software is compatible with our Purad® PVDF, PolyPure® PPn, PP-Pure®, Chem Proline® PE, Proline® PP and Ultra Proline® E-CTFE (Halar®) piping systems.

Socket Fittings

Socket fittings are traditionally used in non-high purity applications.
Only use socket fittings with SDR 21 pipe.
